

Administrative Tools Challenge

TSM Symposium 2005

ISC

- ISC
 - We are not the target market
 - We have a different perspective
- Don't take command line away
- Let us customise interfaces
- Improve ISC in larger enterprises
 - LDAP or other auth plug-in

dsmadmc

- dsmadmc and screen sizes
 - Output formatting does not change with wider terminals
- Customise output
 - Change fields output during queries
 - Change widths of specific fields in output

API

- ISC uses “hidden” API
- We want it too!
- Public API

Extra Data Stores

- DB2 database
 - Custom views
 - Add columns
- In existing TSM
 - Comment fields on key objects
 - Node, filespace, schedule, etc...
